We offer user-friendly experiences with our kitchen and decorative products made from borosilicate glass, produced using bor, one of our country's most valuable underground resources.

Our borosilicate glass products are transparent and have high light transmittance.

They are optically clear and allow light to pass through beautifully. Despite their elegant appearance, they are durable and long-lasting. They are resistant to sudden temperature changes, making them more practical and user-friendly.

Food can be stored for a long time without altering its taste or smell. Thanks to its antimicrobial properties, it does not harbor bacteria or germs.

It ensures safer and healthier food storage.

Borosilicate glass is reusable and environmentally friendly due to its recyclability.
